# CLEANING

## Properties And Advantages

- Regular application prevents the deterioration of the chain and the drivetrain components. This ensures higher performance, smoother shifts and longer drivetrain life.
- The active components induce a quick and profound cleaning process.
- Rubber and plastic safe.

Brake Cleaner has been especially developed for cleaning bearings and disc brakes.

## World Tour Tips!

1. Do not delude chain cleaner with water!
2. Mud off is great for getting tires back black and handlebar tape.
3. Bikewash is great to delude 1/100 and have it premixed in a spray bottle.

## Description

Chain Cleaner is an active cleaner/degreaser suitable for the chain and drivetrain components.

## Application

Apply the Chain Cleaner on the chain, the front and rear derailleurs. Let the cleaner soak in for about 5 minutes then rinse off with soapy water. Then dry and re-lubricate the chain and drivetrain parts. (Always re-lubricate the chain after cleaning.)

## Properties And Advantages

- Regular application prevents the deterioration of the chain and the drivetrain components. This ensures higher performance, smoother shifts and longer drivetrain life.
- The chain doesn't creak, even with heavy use.

## Description

Mud Off is an active and neutral cleaner. The active components induce a quick and profound cleaning of the mountain bike and cyclocross bike. Can be applied to the chain and drivetrain too.

## Application

Apply Mud Off on the dirtiest parts. Let the Mud Off soak in for maximum 5 minutes. Wipe the heavy dirt with a wet sponge (mud, grease...). Rinse with warm water and clean with a dry cloth.

## Properties And Advantages

- The active components induce a quick and profound cleaning on all bike parts.
- Does not leave any traces on chrome, stainless steel, aluminum, carbon, rubber or plastic.

## Description

Bike Wash is an active soap especially developed to clean the paintwork of the bike. Makes the bike shine and protects. Can also be used as car soap.

## Application

Mix 100ml of Bike Wash with 10 liters of water in a bucket, then wash the entire bike.

## Properties And Advantages

- The active components induce a quick and profound cleaning process without leaving traces.
- Enriched with protective wax-components.

# BRUSHES / TOOLS

## Description

Made for perfect cleaning and safe transport of your bike.

## Application

We advise to take out the rear wheel for better cleaning. Install the chain keeper to maintain the pressure on the rear derailleur. If you want to transport your bike in a box or in your car and you want to take out the rear wheel, we advise to install the chain keeper so that the rear derailleur stays in line.

## Description

Use our tool bottle to store Morgan Blue Chain Cleaner, in combination with our Chain Brush, which fits perfectly at the side of the tool bottle.

The tool bottle fits in the bottle cage of your bike, which makes it practical to degrease your chain, but also can be used for small emergency tools during your

## Description

The cassette brush is made for cleaning of the sprocket. Use Morgan Blue Chain cleaner or Mud Off for efficient cleaning.

## Description

The chain brush is made for degreasing and cleaning the chain. Use Morgan Blue Chain Cleaner for the best result.

## Description

The Quick & Clean brush is made for easier cleaning on difficult to reach spots such as behind the drivetrain, under the saddle, the spokes in the wheelset, hollow bottom brackets, under brakes and fork,...

## Description

Our cleaning glove is made of microfibers, which are on both sides of the glove. Use our cleaning glove for easy and fast cleaning of your bike, without scratching the frame. After use you can wash the glove in the washing machine.

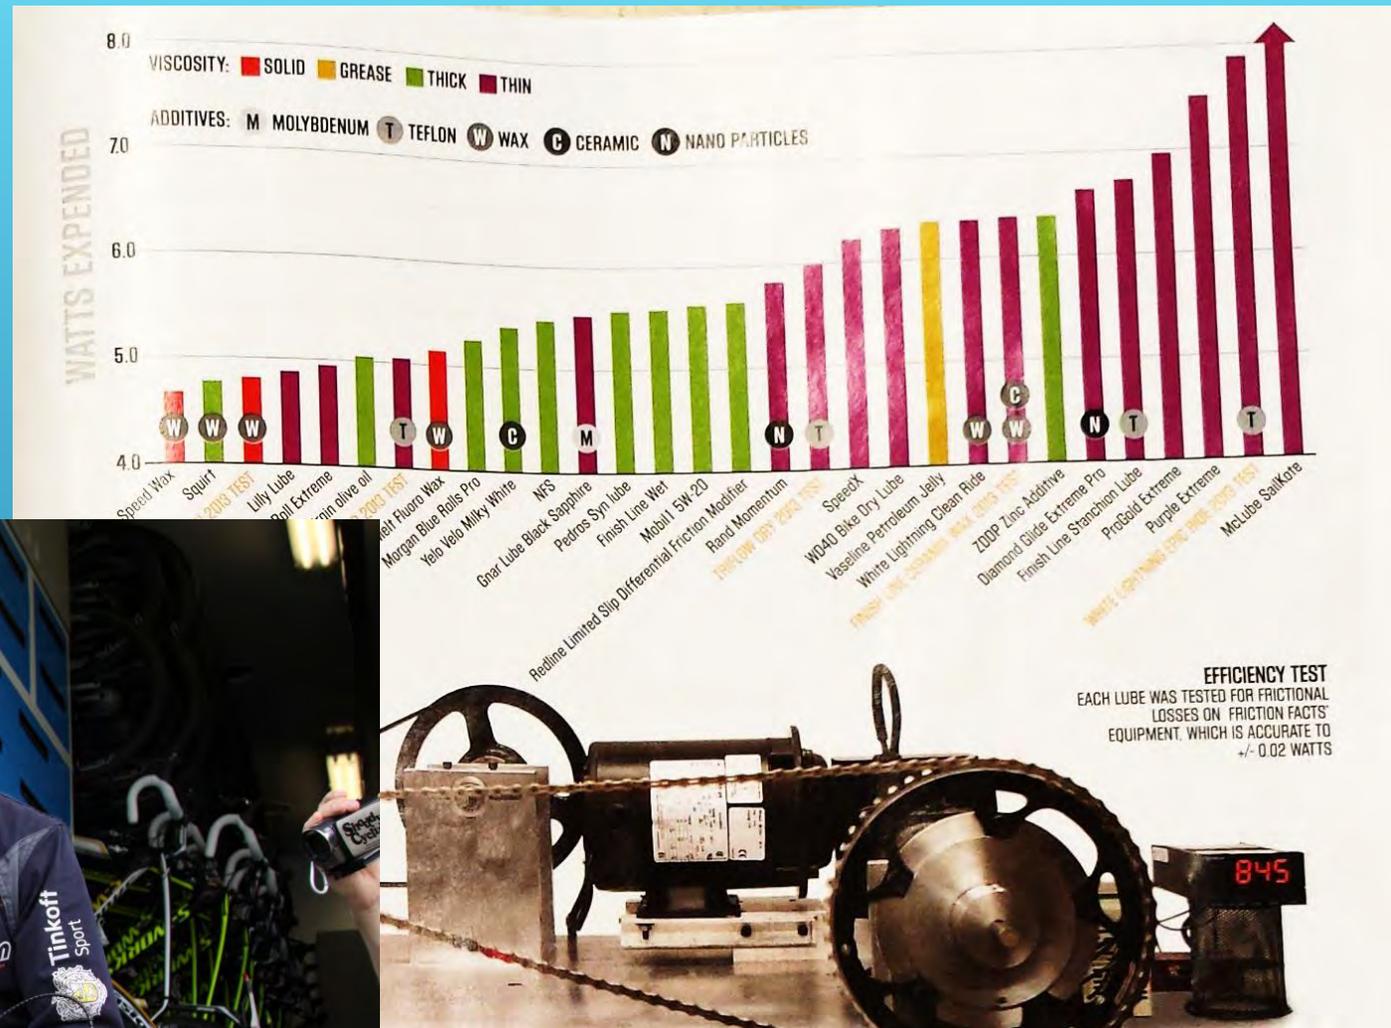

## Description

Our apron is made of thin and light materials, which provides breathability even in hot summer days. Made of 100% cotton.

The compression socks compress the calf lightly, reduces tiring muscle vibration during exercise.

The compression socks provide the perfect after-training recovery effect and can be used in combination with Morgan Blue Muscle Relax cream.

Always put lubricants to the inside loop / bottom of the chain!  
 One drop per link is too much.  
 Let it flow out softly on 1 revolution.

# SPRAY CHAIN LUBES

## Description

Professional, high quality lubricant for all bike applications. Contains synthetic additives to help reduce friction and obtain a smoother gear shift. For use in summer, in dry and wet weather conditions.

## Application

Use Race Oil to lubricate the chain, drivetrain and other moving parts. The lubricant penetrates immediately and does not drip from the chain when applied. Race Oil is suitable for use after having cleaned the chain and drivetrain with Chain Cleaner. Use Race Oil for general lubrication applications too.

## Properties And Advantages

Highly efficient for long periods.  
Highly resistant to heavy loads.  
Extremely low friction.  
Highly waterproof.  
Penetrates fast.  
Excellent adhesion to metallic surfaces.  
Does not drain/drip from the chain.  
Repels dirt.  
Constant lubrication properties in cold and hot conditions.  
Prevents wear and extends life of lubricated parts.

## Description

This high quality silicone spray is designed for MTB and Cyclo Cross use. Extra Dry Lube protects the chain and drivetrain by placing a thin film on the components helping to repel water and dirt.

## Application

Apply the Extra Dry Lube on the chain. For a good maintenance repeat the treatment sufficiently.

## Properties And Advantages

Highly waterproof/repellent.  
Repels dirt, dust and moisture.  
Constant protecting properties in cold and hot conditions.  
Penetrates fast into the chain.  
Prevents corrosion.  
Prevents wear and extends life of lubricated parts

## Description

Silicone Spray protects the chain and drivetrain by placing a thin film on the components helping to repel water, mud and dirt.

## Properties And Advantages

Highly waterproof/repellent.  
Repels dirt, dust and moisture (antifreeze working).  
Prevents wear and extends life of lubricated parts.

## World Tour Tips!

1. Race oil in spray form is perfect for maintaining pivot points. Lubricate derailleurs, brakes, pedals,...
2. Extra dry lube in spray cans coat better more equally the chain and every link inside and out. This gives a clean protected chain against sand, dirt, ...
3. Extra Dry lube is also used by Team Quickstep to store their Time Trial bikes. When a bike is stored for a longer time this lube will not dry out. This way the bike is ready to race any moment of the year.

# DRIP CHAIN LUBES

## Description

Professional, high quality lubricant for all bike applications. Contains synthetic additives to help reduce friction, obtain a smoother gear shift and extend the life of lubricated parts. For use in summer, in dry and wet weather conditions.

## Application

Use Race Oil to lubricate the chain, drivetrain and other moving parts. The lubricant penetrates immediately and does not drip from the chain when applied. Race Oil is suitable for use after having cleaned the chain and drivetrain with Chain Cleaner. Use Race Oil for general lubrication applications too.

## Description

Lubricant based on wax, enriched with a friction modifier, which forms a thin, flexible lubricating coating. Once applied, the liquid penetrates into the inner side of the chain. The wax leaves a lubricating coating which repels dirt. Wax products contain less lubricating properties than oils (like Extra Dry Lube), therefore it has to be re-applied regularly.

## Application

Use Dry Wax on the chain and let it dry long enough. Dry Wax protects the chain against water and dirt. For a good maintenance repeat the treatment sufficient. Don't use Dry Wax at freezing temperatures.

## Description

This high quality silicone spray is designed for MTB and Cyclocross use. Extra Dry Lube protects the chain and drivetrain by placing a thin film on the components helping to repel water and dirt.

## Application

Apply the Extra Dry Lube on the inside of the chain. For a good maintenance repeat the treatment sufficient.

## Properties And Advantages

Highly waterproof/repellent. Repels dirt, dust and moisture. Constant protecting properties in cold and hot conditions. Penetrates fast into the chain. Prevents corrosion. Prevents wear and extends life of lubricated parts.

## Description

Universal lubricant for bikes, added with selected additives, which forms an anti-corrosion coating. Prevents wear and extends life of lubricated parts.

## Application

Use Bike Oil to lubricate the chain, drivetrain and other moving parts. Bike Oil is suitable for use after having cleaned the chain and drivetrain with Chain Cleaner. Use Bike Oil for general lubrication applications too.

## Description

Lubricant which contains selected additives to reduce friction and helps deliver smoother gear shifts. For use in spring and winter.

## Application

Use Rolls Pro to lubricate the chain, drivetrain and other moving parts. Rolls Pro is suitable for use after having cleaned the chain and drivetrain with Chain Cleaner. Ideal lubricant for road races in rainy weather conditions.

## Description

Lubricant which contains selected additives to reduce friction and helps deliver smoother gear shifts. Syn Lube contains excellent properties that are resistant to water, frost and rust. For use in spring and winter.

## Application

Use Syn Lube to lubricate the chain, drivetrain and other moving parts. Syn Lube is suitable for use after having cleaned the chain and drivetrain with Chain Cleaner. Ideal lubricant for road races in rainy weather conditions.

# Protection

## Description

Clean and Protect has been especially developed for MTB and Cyclo Cross bikes on a sandy and muddy track. Spray onto the frame and the mud and sand won't stick.

## Application

The surface to be treated should be clean and dry. Spray Clean and Protect onto the surface and rub in with a dry cloth. Afterwards dirt and dust can be easily removed. Don't use on brakes and rims.

## Properties And Advantages

The antistatic property protects from dust, dirt and mud.  
Protects from corrosion and oxidation

## Description

Protector is used for the treatment of sport shoes, saddle and bike apparel. The surfaces become waterproof and it helps repel dirt, but still allows the fabrics to 'breathe'

## Application

The surface to be treated should be clean and dry. Use the spray only in a well-ventilated room. Let it dry enough. Once applied clothes and shoes will repel water and dirt. Mud and dust can be easily removed. Repeat the treatment regularly

## Description

Carbon Polish is a high quality product for application on bikes. It removes stains made by tar, grease or other substances whilst providing a surface shine. The treated surface is protected by a film which repels dirt and water. Especially developed for carbon frames/forks and components.

## Application

The surface to be treated should be clean and dry. Use the spray only in a well-ventilated room. By its unique 3 in 1 function, the Carbon Polish removes stains, gives a lovely shine and helps repels water and dust. Afterwards dirt and dust can be easily removed. Carbon Polish also can remove grease marks after working on the bike or components. It also helps protecting from winter grime.

## Properties And Advantages

Does not contain chalk, does not scratch. Makes paint and chrome shine. The antistatic property protects from dust, dirt and mud. Protects from corrosion and oxidation.

## Description

Carbon Cleaner is an active cleaner suitable for matt frames and components.

## Application

Apply the Carbon Cleaner on the frame. Rub with a dry cloth.

## Properties And Advantages

The active components induce a quick and profound cleaning process. Rubber and plastic safe.

## World Tour Tips!

1. Clean and Protect is one of BelgiumBike's favorite products. Consider it a fluid wax that also looks good on matt bikes.

# GREASE

## Description

Aquaproof Paste is a synthetic grease that prevents the oxidation of metal parts.

## Application

DO NOT use in the hubs! Aquaproof Paste is especially developed for assembling seat post (seat tube), bottom brackets, headset and screws. This grease makes the parts waterproof, where rubbers fail.

## Properties And Advantages

Very high adhesion.

Extremely water-repellent, even in seawater

## Description

Competition Campa Grease is a complex grease, fortified with polymers and selected additives to obtain an extremely high gliding capacity (wheels spin without resistance).

## Application

Competition Campa Grease has been especially developed for the lubrication of fast rotating parts, such as the bearings in the hubs and bottom bracket.

## Properties And Advantages

Ideally suited for use in the hubs as it works well in grease injection systems.

Very resistant to heavy loads.

## Description

Morgan Blue Carbon Assembly Paste should be used when carbon materials interface with aluminum materials (carbon seat post in an alloy frame). Also ideal for when carbon meets carbon. The adhesive effect allows you to reduce your torque settings by up to 30%.

## Application

Carbon Assembly Paste is especially developed for lubricating seat post (seat tubes), handlebars/stems and other carbon products.

## Properties And Advantages

High adhesion.

## Description

Firm grease based on Calcium and used for a wide variety of applications. Originally grease used for maintenance in the naval industry. Calcium Grease is used for the general assembly of bike components and the lubrication of moving parts. Ideal for use with bearings, spindles etc.

## Properties And Advantages

Good adhesion.

Highly waterproof (<1,5 %).

Good mechanical stability.

## Description

Brake Silencer Paste is a synthetic paste that avoids vibrations on disc brake pads and squeaking.

## Application

Apply the paste between the piston and the rear of the brake pads. Not on the front or the rotors.

## Properties And Advantages

Avoids brake squeaking.

Direct and long lasting effect.

Anti-corrosion.

Resists to high temperatures.

Provides equal pressure on the brake pads.

## World Tour Tips!

1. Combine campa grease with some race oil for the perfect ceramic bearing lubricant.
2. Aquaproof grease is salt water proof, so perfect for triathlon bikes and Florida.

SKINCARE

NATURAL

# MASSAGE & EMBROCATION

## Description

Souplesse is a massage oil with excellent gliding properties. It is ideal for a professional massage. With the addition of rosemary oil and eucalyptus, Souplesse helps recovering the muscles after hard efforts. Souplesse is hypo-allergic.

## World Tour Tips!

1. Embrocations should never burn! Burning sensations occur when blood is getting retracted from the muscle tissue towards the skin surface. For maximal performance we only want to stimulate blood flow.
2. In cold weather ( <68) start using embrocation on legs, lower back, feet, neck, arms and hands.
3. Use embrocation in rainy weather in combination with protection.
4. If our embrocation is not hot enough you should be riding with leg warmers on top of it.

## Description

Muscle Up is a pre-sports oil (no warming up). It stimulates and gives the legs a shiny look. With the addition of sunflower, eucalyptus and rosemary oil.

## Description

Competition 1 is a pre-sports light warming up oil, with a typical penetrating scent. Competition 1 generates heat quickly after application (no massage) and doesn't draw the blood out of the muscles to the skin, so the legs don't turn red. Competition 1 is a 100% natural product with no chemical preservatives, penetrates straight into the skin, with immediate beneficial effects. Contains rosemary oil, which stimulates the blood circulation.

## Description

Competition 2 is a pre-sports hot warming up oil, with a typical penetrating scent. Competition 2 generates heat quickly after application (no massage) and doesn't draw the blood out of the muscles to the skin, so the legs don't turn red. Competition 2 is a 100% natural product with no preservatives, penetrates straight into the skin, with immediate beneficial effects. Contains rosemary oil, which stimulates the blood circulation. Competition 2 can also be used for pain relief of muscles on the back of the body.

## Description

Muscle Oil Color 1 is a pre-sports massage oil (no warming) that gives the skin a tanned look. Muscle Oil Color 1 is a 100% natural product with no chemical colorings or preservatives. Muscle Oil Color 1 contains rosemary oil which stimulates the blood circulation. In this way it helps to prevent the onset of muscle cramps.

## Description

Muscle Oil Color 2 is a pre-sports warming up massage oil that gives the skin a tanned look. Muscle Oil Color 2 is a 100% natural product with no chemical colorings or preservatives. Muscle Oil Color 2 contains rosemary oil which stimulates the blood circulation. In this way it helps to prevent the onset of muscle cramps.

# SKINCARE & RECOVERY

## Description

Foot lotion helps to keep the feet cool for a longer time. Foot Lotion refreshes, disinfects and deodorizes. Refreshed feet stimulate blood circulation in the legs.

## Application

Use Foot Lotion to wash your feet and keep them cool.

Properties And Advantages

Deodorizes  
Refreshes  
Disinfects  
Relaxes  
Cools Down

## Description

Muscle Relax helps improve the recovery of sore and tired muscles.

The formula contains specially selected essential oils that have a stimulating and recuperating effect.

Muscle Relax penetrates easily into the skin with immediate beneficial effects.

Use Muscle Relax before sleeping.

## Description

Solid Chamois Cream is a hygienic protecting cream with the addition of natural vitamin E and herbal extracts.

It helps prevent saddle sores, chaffing wounds and skin irritation caused by friction and perspiration during exercise.

It includes Saint John's Wort oil and olive oil.

## Application

Use Solid Chamois Cream in rainy weather conditions.

## World Tour Tips!

1. Solid Chamois Cream is great for sweaty weather and will last 6-8 hours.
2. For the best recovery use muscle relax in combination with our compression socks.

## Description

Wash Lotion is a liquid for the removal of oil, grease and dirt after sport activities. Available in 1L & 200ml.

Wash Lotion stimulates the blood circulation with its cooling 'rebound effect' and contains degreasing and good cleaning properties. It is used after massages and to remove Protection. Contains alcohol.

## Application

Use Wash Lotion on legs and chest.

## Description

Soft Chamois Cream is a soft hygienic protecting cream with the addition of natural vitamin E and herbal extracts.

It helps prevent saddle sores, chaffing wounds and skin irritation caused by friction and perspiration during exercise.

With the addition of Saint John's Wort oil, olive oil, sunflower oil and rosemary oil.

## Application

Use Soft Chamois Cream in dry weather conditions.

## Description

Chamois Cream Ladies is a hygienic protecting and nourishing cream based on almonds oil purpose-made for ladies.

It helps prevent saddle sores, chaffing wounds and skin irritation caused by friction and perspiration during exercise.

Contains almond oil and natural vitamin E (hydrating).

# SKINCARE & RECOVERY

## Description

Protection is a gel that adds a protective layer on to the skin ensuring protection from wind and rain.

Use Protection before exercise and rub directly on to the skin.

Use Protection as a second layer after applying Competition 1 or Competition 2.

Remove Protection with Lotion, difficult to wash off with water.

## Description

The massage bag is used by professional soigneurs and is large enough to contain the Morgan Blue massage products and some towels.

## Description

Feet Cooling Gel is an intense cooling and refreshing gel for feet.

It prevents agitated feet during competition or training and keeps your feet cool for several hours (the more product used the longer the cooling stays).

Feet Cooling Gel is ideal for racing/training in warm weather.

## Application

Apply Feet Cooling Gel on the feet before the exercise.

Use Wash Lotion to remove Feet Cooling Gel.

## Description

Travel kits are perfect for Triathletes and Granfondo riders that travel the world to compete.

- 2 x Race Oil 2,5cc
- 5 x Soft Chamois Cream 10cc
- 5 x Muscle Relax 15cc
- 2 x Cleaning Tissue

FREE METAL DISPLAY  
with \$ 2500 MSRP value orders.
